Location: Lagos, Nigeria

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with experience in business intelligence, data validation, dashboard reporting, and scientific data curation. Skilled in Excel, SQL, Power BI and data quality assurance, with hands-on ability to clean, transform, analyze, and present data for decision-making. Experienced in working with stakeholders, documenting requirements and delivering clear insights across business and research environments.

TECHNICAL SKILLS

Data Analytics & Reporting: Data Analysis, Data Cleaning, Data Validation, Data Quality Assurance, Metrics Reporting, Business Insights, Report Preparation, Data Storytelling

Business Intelligence & Visualization: Power BI Desktop, Power BI Service, Tableau, Microsoft Excel, Dashboard Development, Interactive Reports, DAX

Database & Data Management: SQL, MySQL, Microsoft SQL Server, Joins, Stored Procedures, Data Extraction, Data Transformation, Data Modeling, ETL Processes

Scientific Data Curation: Microbiome Data Curation, Taxonomic Data Standardization, Literature Review, Research Data Extraction, Microbial Data Interpretation

Collaboration Tools: Stakeholder Communication, Requirements Gathering, Cross-functional Collaboration, Business Process Improvement

PROFESSIONAL EXPERIENCE

Microbiome Data Curator — Remote (Volunteer)

Outreachy | March 2026 - Present

- Curate microbiome signatures from scientific studies by extracting, reviewing, and standardizing taxa linked to disease conditions.
- Analyze research figures, study tables, and differential abundance results to identify relevant microbial patterns for database entry.

- Map microbial taxa to accepted taxonomy references and ensure curated entries align with project curation standards.
 - Review and resolve inconsistencies in taxonomic naming, study interpretation, and extracted research data.
 - Validate curated data against source evidence to improve dataset accuracy, consistency, and reliability.
 - Collaborate with reviewers by incorporating feedback and revising to improve the quality of submitted curation work.
-

Data Analyst

CodeBloch Tech Solutions | August 2025 – Present

- Develop and maintain Power BI dashboards and Excel reports to track sales performance, customer preferences, seasonal trends, and project delivery timelines.
 - Publish and share interactive dashboards through Power BI Service to support real-time reporting and business visibility.
 - Use SQL queries to extract, validate, and compare data across source and target databases for reporting and quality checks.
 - Support database reporting processes by reviewing stored procedures, validating query outputs, and assisting with data accuracy checks.
 - Upload, process, and validate data from flat files into databases using Microsoft SQL Server procedures and structured validation methods.
 - Develop logical and physical data models aligned with reporting requirements and business process needs.
 - Manage SharePoint environments, organize business records, and support workflow tracking for internal reporting activities.
 - Generate monthly performance reports using Power BI Service to support operational reviews and management decision-making.
-

Business/Data Analyst

Laxx Web Solution | March 2023 – June 2024

- Partnered with clients and internal teams to gather, document, and clarify business requirements for website development, redesign, and digital transformation projects.
 - Analyzed website performance and user behavior data, including traffic, bounce rate, and conversion trends, using Google Analytics, SQL, and Excel.
 - Collaborated with developers and UX/UI designers to translate business needs into functional requirements and data-informed design decisions.
 - Built Power BI dashboards and reports to track project progress, budget utilization, client KPIs, and delivery status.
 - Conducted A/B testing analysis to evaluate the impact of design and feature changes, contributing to a 15% increase in client website conversion rates.
 - Mapped end-to-end business processes for client projects, identified workflow bottlenecks, and recommended improvements to support smoother delivery.
 - Prepared reports and presentations for stakeholders, providing insights on website features, e-commerce improvements, and SEO-related performance.
 - Standardized data collection and reporting processes across web projects to improve consistency, transparency, and client reporting quality.
-

Business Analyst Intern

MA Analytics | August 2022 – January 2023

- Supported the BI team in building and maintaining Power BI dashboards to track key business metrics, including revenue growth, customer churn, and operational efficiency.
- Collected, cleaned, and transformed raw data from SQL databases, Excel files, and CRM systems into structured datasets for reporting.
- Wrote SQL queries to extract, validate, and manipulate data for analysis and dashboard development.
- Assisted in creating DAX measures and calculated columns to support advanced performance tracking in Power BI.
- Conducted ad-hoc analyses to identify cost-saving opportunities and provide actionable insights to management.
- Prepared weekly reports and presented findings to senior analysts and stakeholders to support data-driven decision-making.

- Collaborated with finance, operations, and IT teams to gather reporting requirements and support tailored BI solutions.
-

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Coursera
 - Foundation: Data, Data, Everywhere — Coursera
 - Introduction to Microsoft Excel — Coursera
 - Intermediate SQL — DataCamp
 - Advanced SQL Querying — Maven Analytics
 - Power BI Desktop — Maven Analytics
 - Visualization in Power BI — DataCamp
 - Career Essentials in Generative AI — Microsoft/LinkedIn
-

EDUCATION

Bachelor of Science in Soil Science

University of Nigeria

Nsukka, Enugu State, Nigeria

ADDITIONAL INFORMATION

- Available for Data Analyst, Business Analyst, BI Analyst, Reporting Analyst, and Data Curation roles
 - Experienced in remote collaboration, dashboard reporting, SQL-based validation, and research data curation
